

## From Cupboard to Creativity Project Nov 2020 - "String Pieced Surprises"

Hi Everyone,

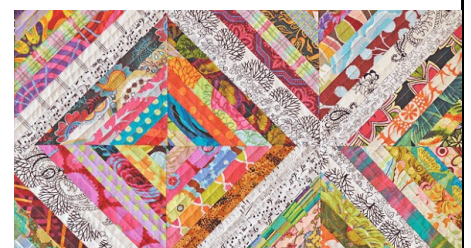

If you have been working through your stash, you may by now have many smaller pieces or strips of fabric left in the boxes, so this month I thought we could put some of those to good use and create a border of string pieced design.

To do this you could start by

1. Deciding on the shape or style you want
2. Choose to sew strips together to create a "fabric" piece then you cut your design from that, OR
3. Sew your strips onto a foundation shape.
4. Have a scrap colour look
5. Place colour in your design to add another element of surprise to your border—secondary patterns may appear.

I have here (to get you thinking) a few ideas that others have used when working with strips so have fun designing your border for this month.

Let yourself play —The strips don't have to be even!

Have fun playing with the string piecing.

Happy Border making :)

Jan P.
