

From Cupboard to Creativity Project

Aug 2020 - "Look to the Stars".

Hi Everyone,

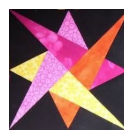

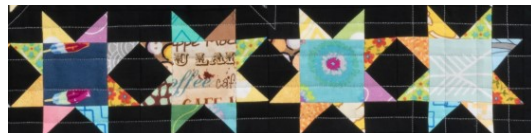

For this month our challenge will be "Look to the Stars".

You may interpret that theme in any way you like.

Think outside the box — Celestial stars, movie stars, sporting stars etc

— have fun using you creative ideas to create a border

Should you choose the more traditional stars, there are many blocks you can choose from and many resources to find them in - some may be your go to favourites, but for this challenge I suggest you try a design you have not used before, or a setting that is new to you.

How you use the star blocks in a border is up to you.

I have here are just a few star options in more traditional settings — play with how you see them in your border.

- just in the corners with something else along the main part of the border
- A row of stars linked together using something different to link them
- Star blocks interspersed with an alternate design feature
- Different sizes in the same or different stars all used together.....

This month is usually our Ekka month, maybe you would like to represent that in your theme in some way.

Have fun playing with this idea, enjoy being creative and using some of that stash!

Take care Jan P.
