

### Inside or Between the Curves

For the August challenge I have decided to broaden the scope of what you can play with, make it a small or large project, by machine or by hand as we explore what can be "Inside or Between the Curves".

You could work inside a circle or other curved shape, between arcs, inside a frame created with curves.

Here are a few examples of quilts I have already made with this idea

Maybe you would like to do a smaller project this month, and maybe stitch out blocks that fit the theme — here are few examples, a butterfly, or felt circles. Here are a couple of inspiring ideas I found.

Perhaps you would like to add a border to a current project that fits the theme.

If a modern quilt is what you feel like exploring, there are many ideas for that option too.

If you prefer, you may take this theme and use it in your quilting to finish off a project rather than start a new one as shown in this example.

Have fun playing with this months curved theme.

Jan P.
